You have just found the easiest, most practical guide to discovering the skill of Calligraphy and it’s not just like every other guidebook you have come across.

*Read on.*

Did you know that most people are visual learners and so not only do they need a great guidebook to learn a skill like Calligraphy but they also need to be shown HOW to do it in order to learn how. So a perfect guidebook alone is not enough.

*Makes sense, doesn't it?*

I started writing Calligraphy when I was just in Elementary School because I was just fascinated by its beauty and elegance. I was excited at all the incredible fonts I could try. Once I got the hang of it I really enjoyed practising Calligraphy and it was so great writing beautiful Calligraphy on all my friends' birthday cards.

But you know what, I do remember clearly getting very frustrated. Whenever I would sit down to practice I would get so annoyed sometimes when my letters didn't look the same as those in the guidebook and I had no idea what I was doing wrong! Ever felt that way?

**I wasn't sure....**

- Just where to start....
- about the angles and the height of the letter lines
- the pen nib pressure
- how to space characters
- why the ink wasn't flowing properly out of my calligraphy pen
- which pen is best to practice with versus which pen to use for my final, quality work
- how high is the capital letter compared to the lowercase letters

It wasn't until I watched my expert friend writing the letters clearly that I "got it" and realised just where I was making my mistakes.

Ever since then it's been an absolute passion!
